Where to find Praxis Core and II:

Start on the Learning Express home page.

You will want to make sure that you are logged into your account before accessing any of the practice tests. If you don’t know how to create an account, please see the guide for creating an account on Learning Express featured on the web page.

Click on the link for Featured Resource List.

In the new window, click Teaching, which is located under the column for Prepare for an Occupation Exam.
You can now click the link for Praxis I or II

You can now choose which of the Praxis practice tests you would like to take. In this example, let’s suppose that we want to take the Mathematics Practice Test, which is located in the Praxis I list. When we click on the link, a window pops up asking for your login information. If you have already created an account, just click Login.

You may now enter your login information. Be sure to remember that your user name is the email you used to register the account.
In the new window that pops up, it will ask what kind of test you would like to take. In this example, we want to leave the option **Simulation** selected. When you are ready to take the test, you may then click **Start Test**.

The test window will now appear.
